PROBLEM STATEMENT

Existing tools/applications are fragmented

- Existing products operate isolation such as PitchBook, ChatGPT-startup classifier (notably in Korean ecosystem)/Scouting Novable.
- Require membership or subscription even basic information
- Professional networks like LinkedIn/Global Work AI is static and too complex solutions.

Information Asymmetry

- Insufficient quantitative data: limited unreliable, or non-standard metrics to ground stage classification.
- Weak data-driven clarity: Early market signals and customer trends are missed or ignored.

Shortage of Qualified Assessors

- Skill-role mismatch and difficulty aligning team capabilities with strategic priorities

Underused Real-time Automation and unsynchronized

- Manual and Insights aren't continuously updated
- Unclear Growth/Stage Signal: No consistent method to determine stage (Ideation → PMF → Scale) or next moves.

Why LoopAI Matters

What makes LoopAI Stand Out

- Beats PitchBook, deep but static, manual, and outdated data (i.e., human reviews and validation).
- While PitchBook and Novable only reports a static stage, LoopAI reveals the real-time probability and confidence behind its clarity.
- While Pitchbook heavily relies on company announcement, LoopAI draws from broad public signals to deliver more neutral and unbiased.
- Strong dual memory system- making it smarter and faster.
- All-in-one intelligent domain.

Benefits for Founders, PM, VCs & Users

- Founders: Self-assessment to prepare for future funding.
- PMs: Track competitors' stages to guide product strategy and positioning.
- VCs: Eliminate guesswork.
- All Users: Access a live chatbot combining sales, services, and insights in one interface.

Key Features

- Startup stage classifier (React)
- Real-time CareerAI (Skill Match)
- Live Chatbot

Limitations

- 🎯 Product Accuracy
- 🛡️ Data Privacy

Optimized Solutions

- Data-driven, automated AI-curated matches help close deals faster.
- Huge cost savings and less time spent.
- VCs: 10x efficiency in sourcing and evaluation.
- Founders: 3-5x higher response rates vs. cold outreach.
- Fast and Last: unblock non-technical to build, test, and fix by themselves with guardrails.
- All: Democratized access.

THANK YOU

LET'S TALK

APPENDIX

NEXT STEPS

01

LAUNCHED PROTOTYPE

Conversational AI with
contextual memory and
Stage Classifier.

02

PILOT MCP

Integrated MCP for auto-
generate real-time market and
sentiment insights

03

SCALE

Integrate fundraising, talent,
and market modules for full
AI orchestration.

04

FROM LAB TO DESK

Turing cutting-edge AI into
solutions that last.

STARTUP PITCH DECK WALKTHROUGH

LOOPAI

WHY IT MATTERS?

01

THE PURPOSE
BEHIND LOOPAI

02

KEY FEATURES &
HOW IT WORKS?

03

WHAT'S NEXT?

04

Business Problems

Investors and founders waste time looking for each other.

- 70% of pitches are rejected for misalignment
- <1% hit rate at Top-tier VCs
 - Review 5,000+ pitches annually, invest in 10–30 deals
- Most startup applications are fragmented, overly complex—build around IT-designed algorithm, and not intended for real-time, interactive collaboration.

Optimized Solutions

Data-driven, AI curated matches close deals faster.

- VCs: 10x efficiency in sourcing
- Founders: 3–5x higher response rates vs. cold outreach
- **Fast and Last:** unblock non-technical to build, test, and fix by themselves.
- **All:** Democratized access

Business Cases

Investor-focused & Strategic

We combine startup analytics, product strategy, and AI innovation expertise to solve the right problems at the right stage — providing actionable guidance that accelerates growth, de-risks execution, and empowers founders and teams.

Cutting-Edge Technology

A composable stack blends state-of-the-art services with battle-tested systems, minimizing risk and maximizing performance.

Outcome-driven

We modernize what we have into what customers need—reimagining legacy tools into revolutionary, gap-bridging applications.

Proven Success

Always-on monitoring keeps our automations performing correctly, while **TRUST** principles guide reliability, security, fairness, sustainability, and transparency.

Key Differentiators:

Feature	LoopAI	ChatGPT	LinkedIn	Novable	Traditional VC Tools
AI-Powered Analysis	✓	✓	✗	⚠	✗
Personalized Memory	✓	✗	⚠	✗	✗
Real-Time Updates	✓	✗	⚠	✓	✗

OUR CORE FEATURES

[LoopAI Platform](#)

Startup Classifier (React)

An actionable analytics console to unified view that blends data + narrative + context for managers, investors, advisors. Explore compare, and act on insights beyond static dashboards- from deep dived to business overview

Real-time CareerAI (Skill Match)

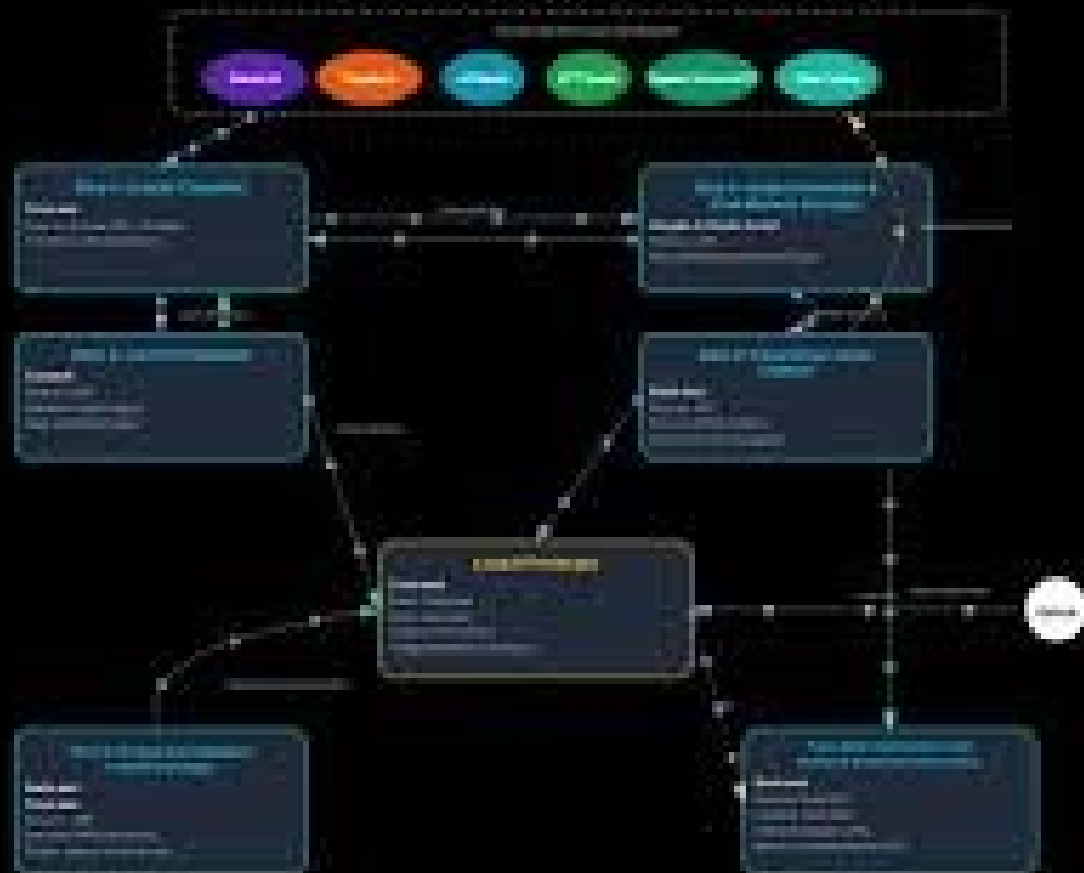

Instantly matches roles to candidates by parsing large resume/profile pools (e.g., LinkedIn-style). Founders get one-click shortlists ranked by skills, experience, and team fit.

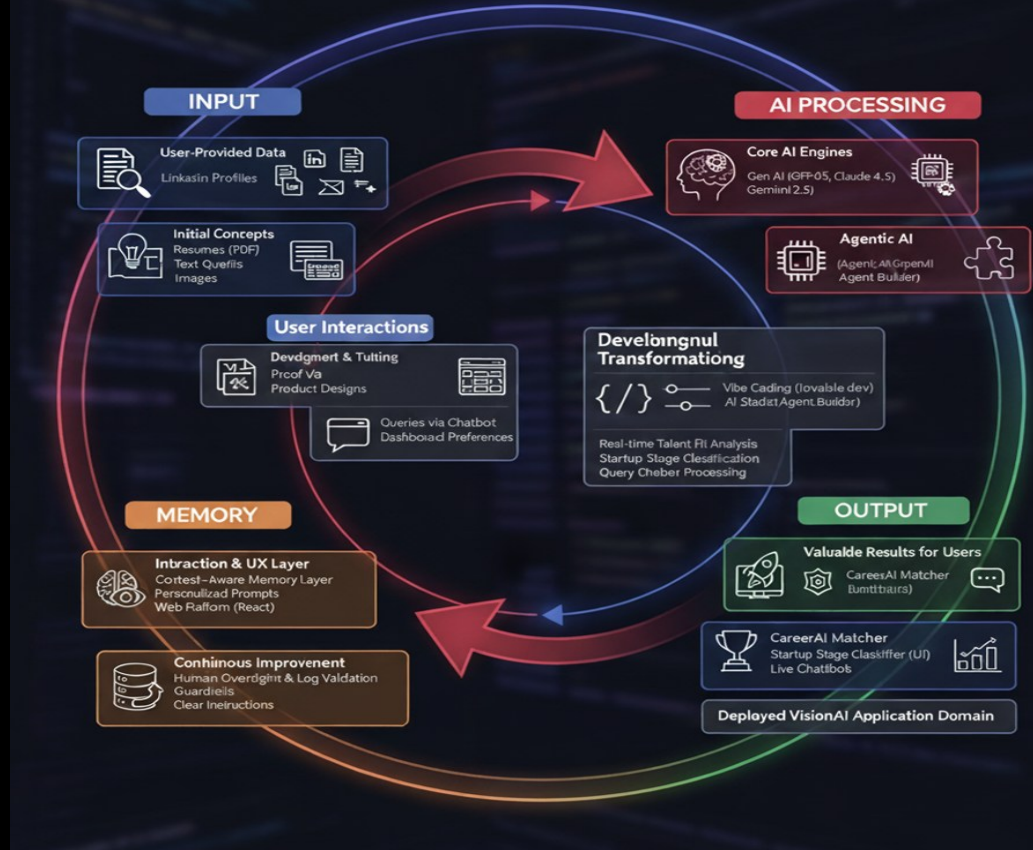

Live Chatbot (with Guardrails)

Real-time scalable AI assistance that surfaces startup insights on demand. Human-in-the-loop oversight, log monitoring, and automated incident reporting help reduce hallucination risk and support data-privacy processes.

LoopAI Startup Architecture

LOOPAI PROJECT WORKFLOW

Key Takeaways

- AI unlocks unstructured text into real-time, scalable, context-aware intelligence.
- Memory layer = edge: remembers interactions, delivers compounding personalization, and builds a defensible data moat.
- Prototype live (BUS25 DevDay); next up: financial stress testing (PWMOIC), KPI assessment, sentiment (VADER/spaCy), and due-diligence module.
- Deploy live analytics + auto insights for the broader startup ecosystem.
- Trust & quality: rigorous validation/hyperparameters; backend incident reports (algorithm, technical, hallucination).
- Closed loop learning: collect customer feedback and learn from outcomes to prioritize the roadmap.
